

**CLAIMS:**

1. A portable wall member for installation at a desired location, the wall member having a generally horizontal length and a generally vertical height which is less than said length, with the length extending between end faces, said member including:
  - 5 a cast concrete base extending longitudinally between the end faces and to rest on a supporting surface at said location;
  - a wall portion extending between the end faces and upwardly from said base to said height; and
  - at least one duct extending between said end faces to provide for services to
  - 10 extend through said member.
2. The wall member of claim 1 wherein said duct is provided in said base.
3. The wall member of claim 1 wherein said duct is located in said wall portion.
4. The wall member of claim 3 is a plurality of ducts extending between
- 15 said faces.
5. The wall member of claim 4 wherein one of said ducts is adapted to provide for the ducting of water, with said wall member having an outlet for water longitudinally intermediate said faces.
6. The wall member of claim 4 wherein one of said ducts are provided for
- 20 the ducting of electric cabling, and said member has an upwardly extending duct for the provision of a light to be connected to said cabling.
7. The wall member of claim 1 wherein said member has embedded in it a volume of material having a density less than the density of said concrete.
8. The wall member of claim 7 wherein said material is expanded plastics
- 25 material.
9. The wall member of claim 8 wherein said material is expanded polystyrene.
10. The wall member of claim 3 wherein said wall portion is formed of cast concrete.
- 30 11. The wall member of claim 1 wherein said base and wall member are integrally cast from concrete.
12. The wall member of claim 1 wherein said wall portion is formed of cast concrete and is mounted on said base.

13. The wall member of claim 1 wherein said wall portion is formed of sheet material having longitudinal extremities attached to said base so as to co-operate therewith to provide a longitudinally extending hollow.

5 14. The wall member of claim 13 wherein said duct extends through said hollow.
